

The interchange listing AE to Drayton Valve Seats should be used with caution, as there are relatively few instances where the range sizes are identical. It should also be noted that both the material specification and method of manufacture used will differ from our competitors. Our range offers numerous alternative size range options and as the product is more easily selected and used by size rather than specific engine/model application, we recommend that the complete Drayton range be studied for regular use.

Drayton Part No	AE equivalent	DA insert nominal (mm)		
		OD	ID	Depth
C1102-E1	VS6500 / VS6533	28mm	20	8.0
